LITERATURE OF THE DAY. SCIENCE OF VALUE TO ALL MEN.

M. Quartrefages, in an address before the French Association for the Advancement of Science, at Bord-aux, thus emphasizes the value of scientific knowledge, not only for those who make it a specialty, but for all practical and intelligent men: All men cannot be expected to enlist un-

der the bauner of professional science. But all may and must acquire scientific notions, of the intervention of special men, and to touch those letters with the be able to judge when that intervention be- finger. Another of his inventious is a mecome the sovereign of the world. What machine pricks its way along the paper, help of the engineers, and would remain | sense of touch. Others can use the macontent with the progress already accounplished? What branch of manufacturers procurable in blind type, and he can then would decline the holp of chemistry? What | read it with his fingers and indirectly have medical practitioner, worthy of that name, access to the literary gems which would would consent to forsake physiology, that philosophy any more than anatomy? What sharp as that of a man of education comintelligent agriculturalist does not understand that the problems of culture and pro- faculties. Since he cannot hear himself duction are essentially questions belonging speak, the fact is a remarkable physic panto zoology, botany, geology, and chem, gle-for the best of us learn accuracy of istry? And in this great city, one of the pronunciation and distinctures of enunciaqueens of universal commerce, what mer- tion by dint of long practice and study, whant would deny the importance of geo- educating ourselves by the aid of our care

Science is as indispensable to the military cal practitioner, and the agriculturalist. I years ago he published a volume of poetry. am not going to undervalue the share that . At every point he is a master. Iambic penin war falls to inspiration and gallantry. But inspiration must be enlightened by iambic tetrameter ripped from Scott's pen. ous equal in efficiency and power to those master all the sciences, the help of which is sort of poetry he likes. - New Ofleuns Plos necessary to his profession. He cannot be expected to solve by himself all the problems raised by his single art. It is essential that he should first ascertain these problems and confidently appeal to scientific men, pointing out to them the application first Englishman to wear a watch and this he wants. Let us, therefore, stir up the in- consisted of "onne larum or watch of iron, tellect of all men.
